	<i>www:</i>		www.belogroep.nl			
<i>date:</i>		18.10.2016				
Description of activities	We engineer and produce input systems and pre-treatment systems for biogas plants. We are the inventor and producer of the Molares® pre-treatment system, and we engineer and produce our own walking floor system with low absorbed power and low maintenance costs. So we also engineer and produce machines and products for the whole biogas plant such as agitator, hydrolyse, heating plate, piping.					
Range of activities (please tick)	x	<i>pre-treatment systems</i>		<i>digestion systems</i>		<i>upgrading systems</i>
Type of company			Yes		No	
	<i>Technology supplier</i>		x			
	<i>End-user</i>				x	
	<i>Research unit</i>				x	
	<i>Consulting company</i>				x	
	<i>Engineering company</i>		x			
<i>Production company</i>		x				
Experience in research projects			x			
Other comments	We tested pre-treatment of grass with the Molares® by Acrres (Wageningen University) with good results, e.g a gas yield increase of 15-20 % and no floating layers.					
Expectations from Record Biomap, e.g. - to find consortium partners for possible projects? - do you already know any funding call or other funding opportunities? - attend our planned workshops? - to find customers?	Our expectation is to find new customers and to further develop the Molares®. Also we are interested in developing other new products.
