<i>date:</i>	21.02.2017					
Description of activities	We developed a biogas upgrading process with membrane contactors and built a small public upgrading plant in combination with a CNG station in Germany. The biogas upgrading process is patent protected. Since 2016 we work together with a mechanical substrate sludge disintegration by ultra-sonic. We built two very successful units for municipal sewage treatment plant and want to start to supply these units for biogas plant this year.					
Range of activities (please tick)	<input checked="" type="checkbox"/>	<i>pre-treatment systems</i>	<input checked="" type="checkbox"/>	<i>digestion systems</i>	<input checked="" type="checkbox"/>	<i>upgrading systems</i>
