<b>Description of activities</b>	<p>Air Liquide is a main actor in the gas industry, supplying solutions &amp; producing gases for various applications, going from the food industry to welding, and health industry.</p> <p>Since the 1990's Air Liquide has developed a great experience in the membrane technology, and produced more than 2000 systems based on membranes. In 2006, Air Liquide successfully adapted the process to biogas upgrading, starting a new opportunity of development for the market.</p> <p>Since then, the company has acquired a strong technical expertise in CO2 and pollutant removal, making Air Liquide a leader in biogas upgrading, with more than 50 references worldwid, and a biogas treatment capacity of more than 800 Millions Nm3/year. The biomethane can be used for various applications, such as grid injection for natural gas usages, or liquefaction or compression for mobility.</p>
