<i>date:</i>	12.07.2017				
<b>Description of activities</b>	<p>The chair of CentraleSupélec has three areas of expertise: Biotransformation (production of yeast for fermentation, plant-cell cultures for the production of biomolecules, design of bioprocesses and bioreactors) Downstream processing (gas separation, preparative chromatography, membrane contactors, membrane filtration) and Lignocellulosic biomaterials (bio-based materials, lignocellulose deconstruction). All activities share a common modelling background.</p> <p>By sharing its expertise via R&amp;D collaborations, the Chair forms a bridge between its academic mother institution, CentraleSupélec, and the relevant agricultural Industry.</p>				
<b>Range of activities (please tick)</b>	<input type="checkbox"/>	<i>pre-treatment systems</i>	<input type="checkbox"/>	<i>digestion systems</i>	<input checked="" type="checkbox"/> <i>upgrading systems</i>
<b>Type of company</b>	<i>Technology supplier</i>	<b>Yes</b>		<b>No</b>

<b>Other comments</b>					
<b>Expectations from Record Biomap, e.g.</b> - to find consortium partners for possible projects? - do you already know any funding call or other funding opportunities? - attend our planned workshops? - to find customers?	<p>To find industrial partners to lead a demonstration project and to industrialize the patented biogas upgrading technology.</p> <p>To be aware of funding opportunities for a demonstration project.</p>
